### HOW WE DO IT:

Customers continually tell us they 'just want their technology to work' so they can get on with their business. We apply our proprietary, pro-active approach:

**Total Intel®** (TI = education + experience)

to solve problems and install the systems required to keep abreast of today's fast-paced world.

**MAFER-NET** provides top-tier services so clients get the maximum return on their IT investment. Our customers' IT -peace-of-mind is packaged in a subscription-based service called **IT-SOS®**. When compared to an independent IT technician, or the costs of your own internal IT department, **IT-SOS®** costs less and gives you immediate access to expert staff whenever help is required - 24/7.

### OUR SERVICES:

We offer the following:

- **Cloud Application System**
- Network Optimization
- System Security Audit
- Software Licence Management
- Upgrades and Migrations
- Mergers, Acquisitions and Integration
- Systems Management
- Disaster Recovery Planning
- Business Continuity Strategies
- Desktop Support

If there is some other service you wish to explore, please contact us for more information.

### MAFER-NET CLOUD APPLICATION SYSTEM:

This system enables you to work in a unified desktop environment through a computer at the office, at home, on a common area computer, in your client's location, or in an internet cafe. With our Cloud Application System, your ability to work will no longer be tied to an individual computer; you will be able to access your work with full capabilities from any computer. It gives you:

- Full access to your data AND applications from anywhere in the world, anytime that has Internet connectivity.
- Full access to networked peripherals in your office (dependant on type of deployment)
- Works with PCs (Windows 98-Windows 8.1) AND Macintosh systems (OS X).

### MAFER-NET vs OTHER CLOUD BASED SYSTEMS:

You get access to fully functional, industry standard applications including, but not limited to:

- Microsoft® Office Suite Professional 2010
- Microsoft® Exchange Services (email)
- Adobe® Acrobat Professional
- Intuit® QuickBooks
- Sage® Simply Accounting

Services include, but not limited to:

- Remote Support (PC2PC)
- Remote Support (Terminal Server)
- Nightly Backups

**MAFER-NET** has the education, experience and expertise to develop a system that will meet your needs including our **Multilingual Cloud Application System.**
